Age-Related
Expectations

| R | Begin to relate subtraction to 'taking away'. | Pictures/Objects <br> I have five cakes. I eat two of them. How many do I have left? |  | Symbols <br> Mom baked 9 bis | ts. I ate 5 . How many were left? <br> Might be recorded as $9-5=4$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Y1 | Represent and <br> use number <br> bonds and <br> related <br> subtraction Takin <br> (mod <br> facts within <br> 20 <br> Subtract one- <br> digit and two- <br> digit numbers <br> to 20, <br> including zero. -1 <br>  -1 |  | Taking away (efficient jumps) $13-5=8$ $\begin{aligned} & 13-3=10 \\ & 10-2=8 \end{aligned}$ | Counting on - jumps of 1 Used to find the differences between numbers that are close. <br> (modelled using bead strings) $11-8=3$ | Counting on (efficient jumps) <br> Number line/ no number line $\begin{aligned} & 11-8=3 \\ & 8+2=10 \\ & 10+1=11 \end{aligned}$ |
| y2 | Subtract numbers using concrete objects, pictorial representations, and mentally, including: <br> - a two-digit number and ones <br> - a two-digit number and tens <br> - two twodigit | Pictures/ Symbols $45-22=23$ | Number lines - taking away  Partitioning <br> $74-27$ <br> $74-27=47$ -20 74 <br>  -3 -4 |  | Number lines - counting on 74-27=47 To find the difference |

|  | numbers <br> - adding <br> three onedigit numbers |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Y3 | Subtract numbers with up to three digits, using formal written methods of subtraction. |  | Number line - taking away $\begin{array}{\|ccc} 326-78=248 \\ -8 & -70 \\ \hline 248 & 256 & 326 \end{array}$ <br> Vertical number line may be used to record calculation | Decomposition Without exchanging <br> $275-32=243$ <br> H T O <br> $200+70+5$ <br> $30+2$ <br> $200+40+3$ <br> Starting with the ones column | Decomposition With exchanging $272-48=224$ $\begin{array}{r} 60 \quad 1 \\ 200+70+2 \\ 40+8 \\ \hline 200+20+4 \end{array}$ |
| Y4 | Subtract numbers with up to 4 digits using the formal written methods of columnar subtraction where appropriate. | Number line - counting on $754-186=568$ <br> Vertical number line may be used to record calculation | Decomposition With no exchanging $\begin{aligned} & 368-173=213 \\ & H \quad \text { T O } \\ & 300+80+6 \\ & 100+70+3 \\ & \hline 200+10+3 \end{aligned}$ | Decomposition With exchanging $723-458=265$ <br> 6001101 <br> $700+20+3$ <br> $400+50+8$ <br> $200+60+5$ | Decomposition (compact method) $741-367=374$ $\begin{array}{lll} 6 & 131 \\ 7 & 4 & 1 \\ 3 & 6 & 7 \\ \hline \end{array}$ <br> 374 |
| Y5 | Subtract whole numbers with more than 4 digits, including using formal written methods (columnar subtraction). Subtract decimal numbers. | Number lines - counting on $72.5-45.7=26.8$ | Decomposition With exchanging$2362-548=1814$10001 <br> 200$\quad 1$ <br> $2000+300+60+2$ <br> $500+40+8$ <br> $1000+800+10+4$ | Decomposition (compact meth $72.5-45.7=2$ $\begin{array}{lll} 6 & 11 & 1 \\ 7 & z \\ 4 & 5 . \\ \hline \end{array}$ <br> 26. |  |

| Y6 | As above. |  |
| :--- | :--- | :--- |
|  |  | Recognise when one written method is more efficient (See $\mathbf{y} 5$ methods of recording) |

Multiplication
Age related $\longrightarrow$ Recording
expectations

| R | Count repeated groups of the same size. | Practical/recorded using apparatus and drawings | Pictures/ Objects <br> 3 plates, 2 cakes on each plate | Symbols <br> 3 plates, 2 cakes on each plate |
| :---: | :---: | :---: | :---: | :---: |
| Y1 | Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher. | Practical/recorded using ICT |  | ing bead strings) <br> mes) or (three group of two) |
| Y2 | Recall and use multiplication and division facts for the 2,5 and 10 multiplication tables, including recognising odd and even numbers. | Pictures/Symbols There are three apples in each box. How many apples in four boxes? <br> III III III III | Repeated addition $5 \times 3 \text { or } 3 \times 5$  | Arrays <br> Also $14 \times 2$ as $(10 \times 2$ and $4 \times 2)$ |

Division

| Y6 | Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context. Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context. | Grouping (efficient) <br> $25.6 \div 8$ <br> (estimate: $24 \div 8=3$ ) $\begin{aligned} & 8 \longdiv { 2 5 . 6 } \\ & \frac{-24.0}{1.6}(3.0 \times 8) \\ & \frac{-1.6}{0}(0.2 \times 8) \end{aligned}$ $3.0+0.2=3.2$ $25.6 \div 8=3.2$ | Long division $560 \div 24$ <br> (estimate: $550 \div 25=22$ ) $2 4 \longdiv { 2 3 } \begin{array} { c }  { \quad \text { r } } \\ { \frac { - 4 8 0 } { 8 0 } } \\ { \frac { - 7 2 } { 8 } } \end{array}$ | Short division <br> $43.4 \div 7$ <br> (estimate $42 \div 7=6$ ) $7 \longdiv { 4 3 . 2 }$ |
| :---: | :---: | :---: | :---: | :---: |
